About Alauda: Proven Enterprise Platform

FOUNDED BY AZURE PIONEERS

Yue Zuo, CEO

Former Microsoft Azure Founding Engineer.
Led Windows Container team.

Kai Chen, CTO

Former Microsoft Azure Founding Engineer.
Led Windows Container team.

INDUSTRY RECOGNITION

**Gartner MQ
Honorable Mention**

DevOps Platform

2023 & 2024

2014

Founded

~300

Employees

500+

Customers

2M+

vCores Deployed

#1 Container Platform in China by market share. Over 50% of top 100 IT-spending enterprises.

Why Replace OpenShift Now

DRIVER #1

OpenShift is Too Expensive

Customers paying \$500-\$1,000 per vCPU per year are actively seeking alternatives as licensing costs grow with scale.

DRIVER #2

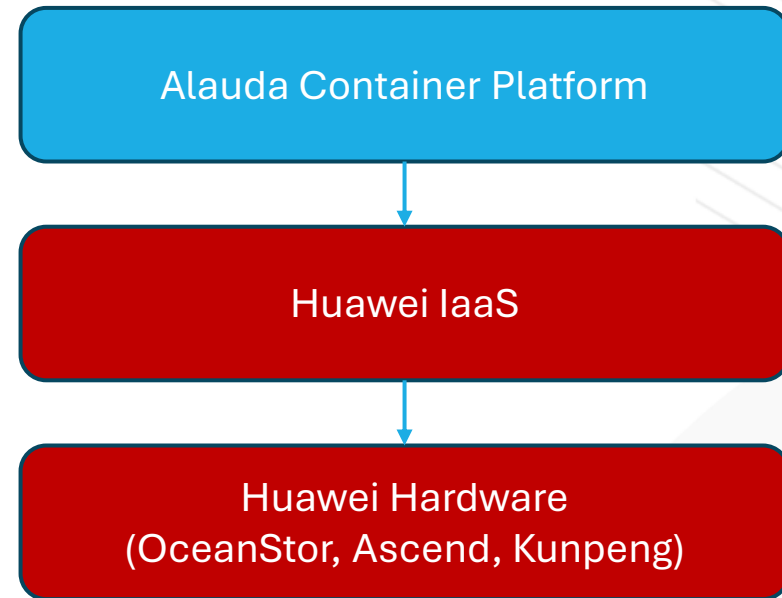

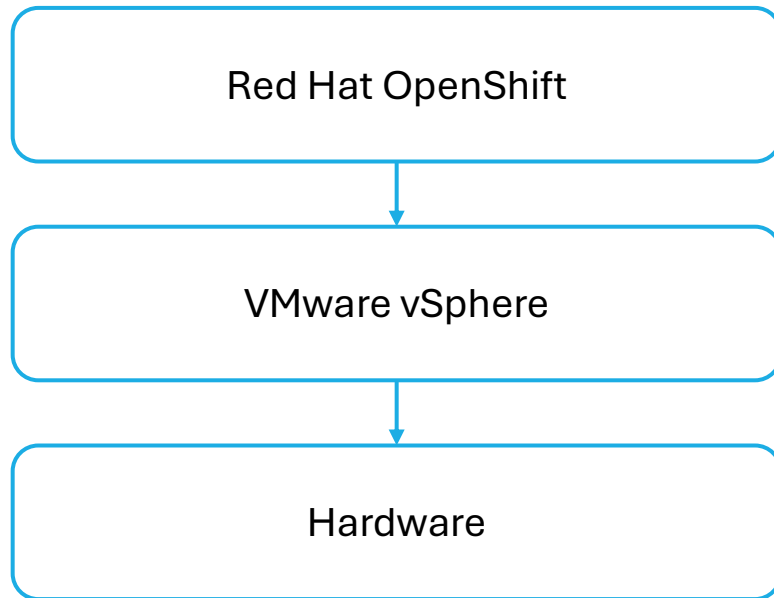

VMware Replacement Wave

Broadcom's VMware acquisition is triggering mass migration. Customers need to replace OpenShift alongside VMware.

Alauda is the ONLY proven OpenShift replacement

Feature-for-feature parity with OpenShift Platform Plus. Successful enterprise migrations completed.

Joint Solution: Complete Stack Replacement

Full-Stack Automation

Automates the entire stack from VM to Middleware for effortless hyper-scale management.

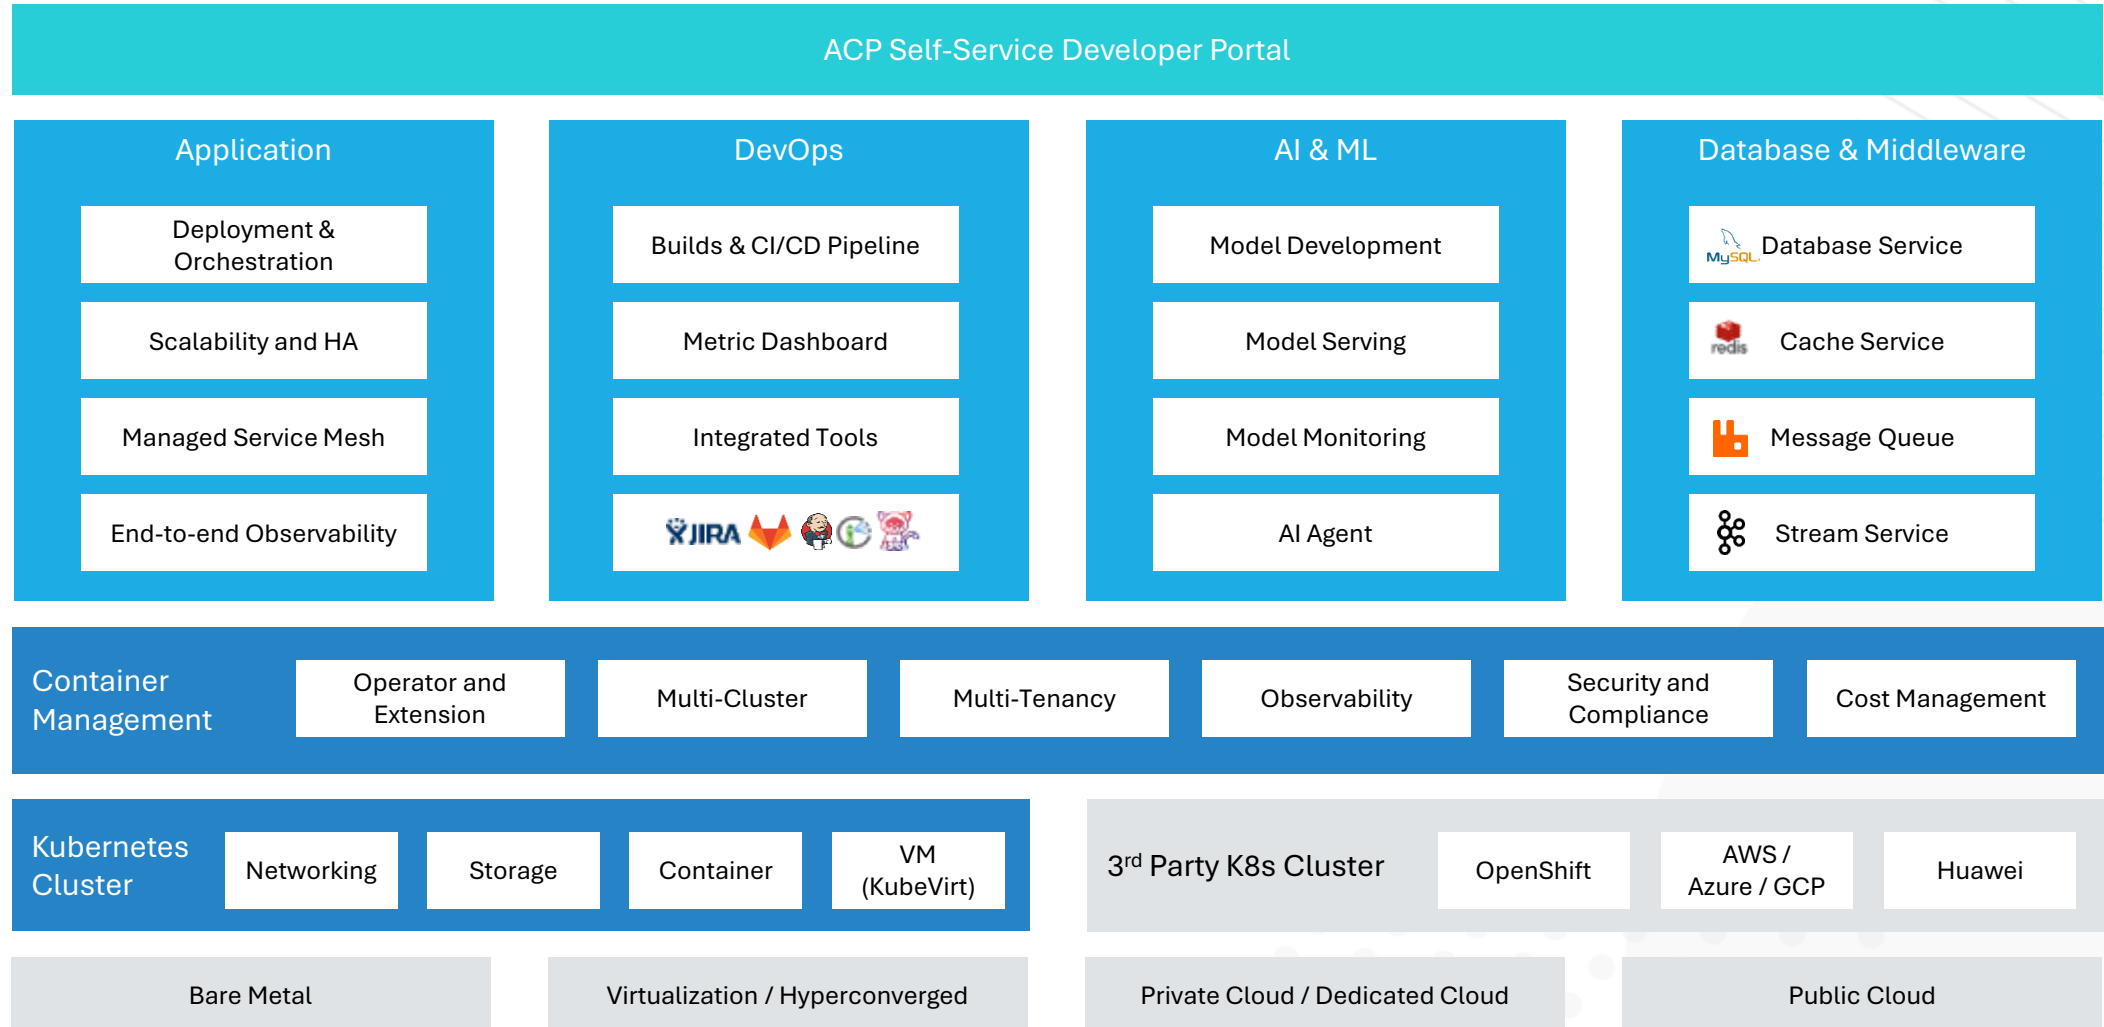

Native Hardware Optimization

Natively tuned to maximize Kunpeng compute and Ascend AI performance.

Data & Storage Synergy

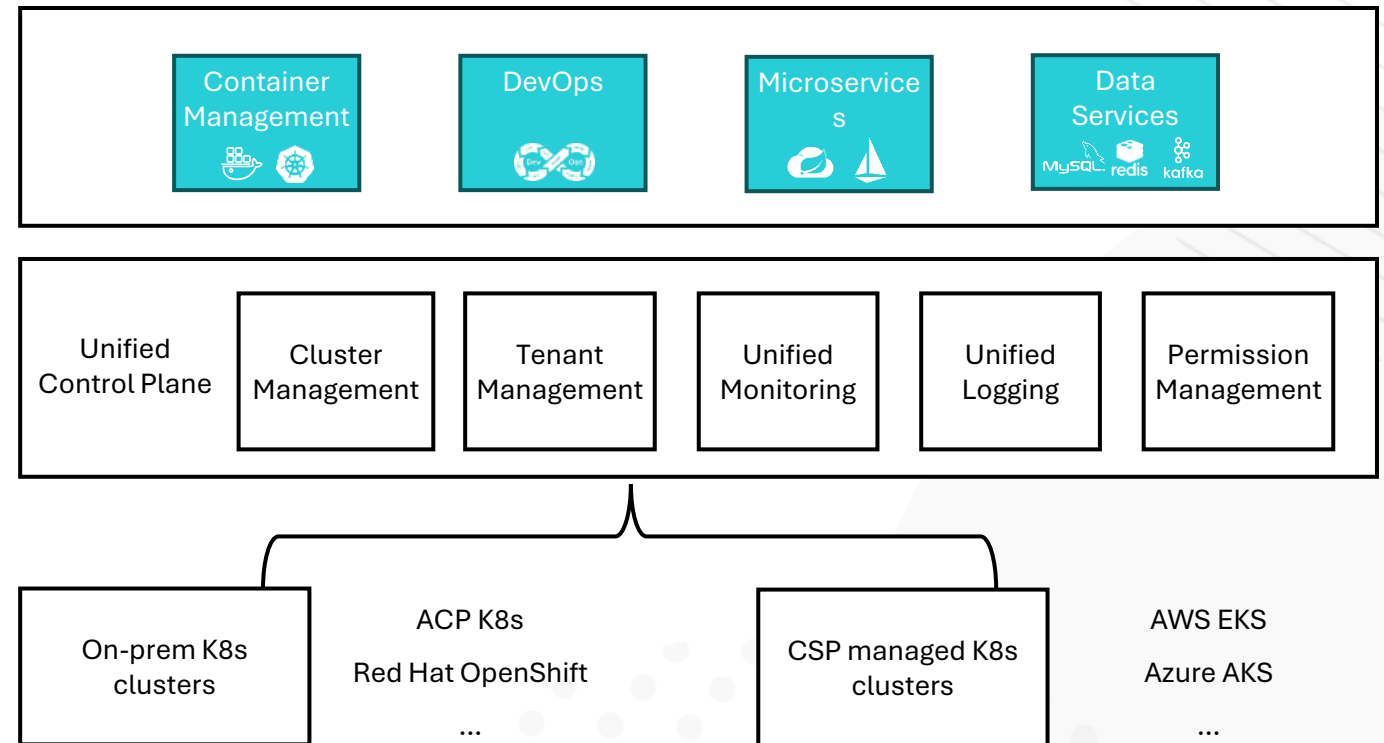

Deep integration with Huawei storage unlocks bare-metal I/O speeds for critical databases.

ACP: AI-Ready Cloud Native Platform

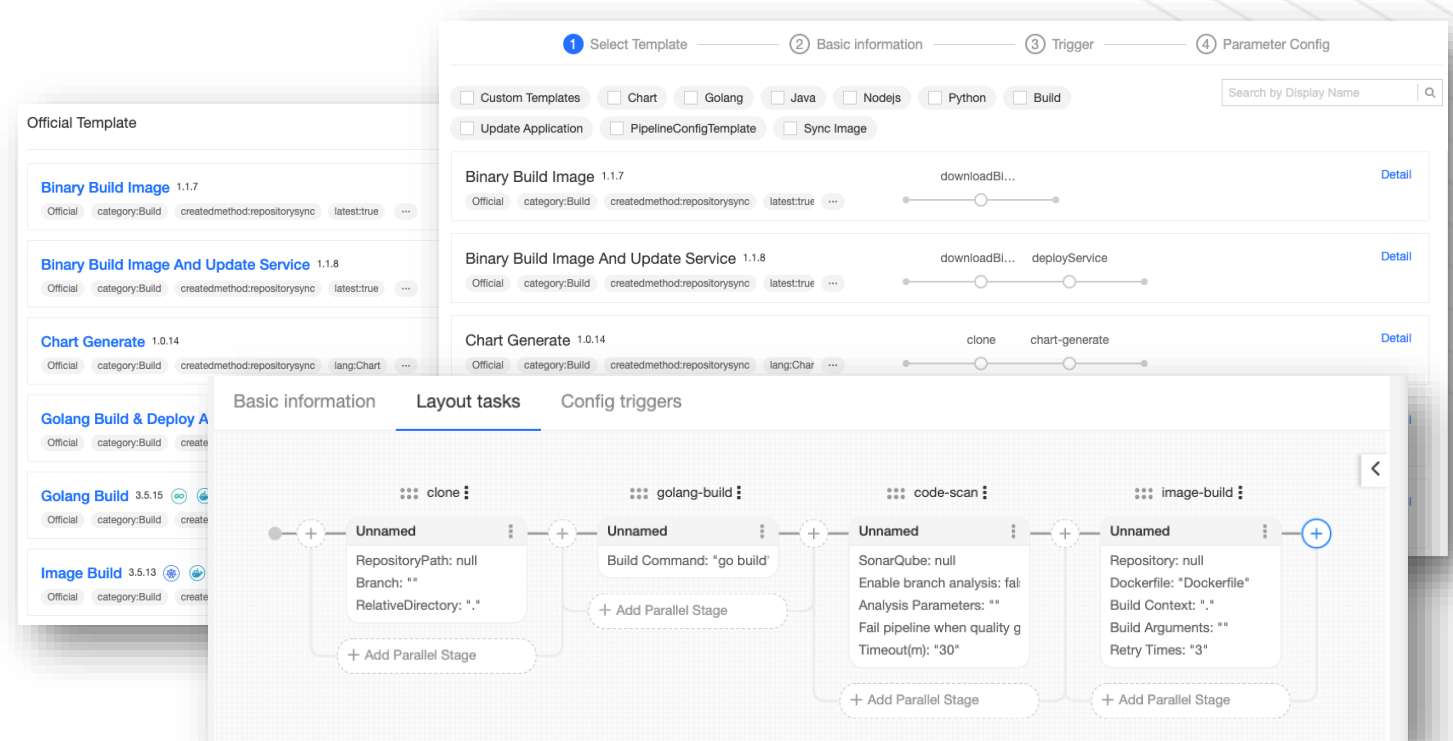

Hybrid & Multi-Cloud

- Manage any K8s distro (CSP-managed, OCP, upstream) across any environment (on-prem, cloud, edge)
- Automate Kubernetes cluster lifecycle management at scale
- Ensure consistent configuration, security and compliance across all environments
- Provide unified operations and consistent experience across all environments

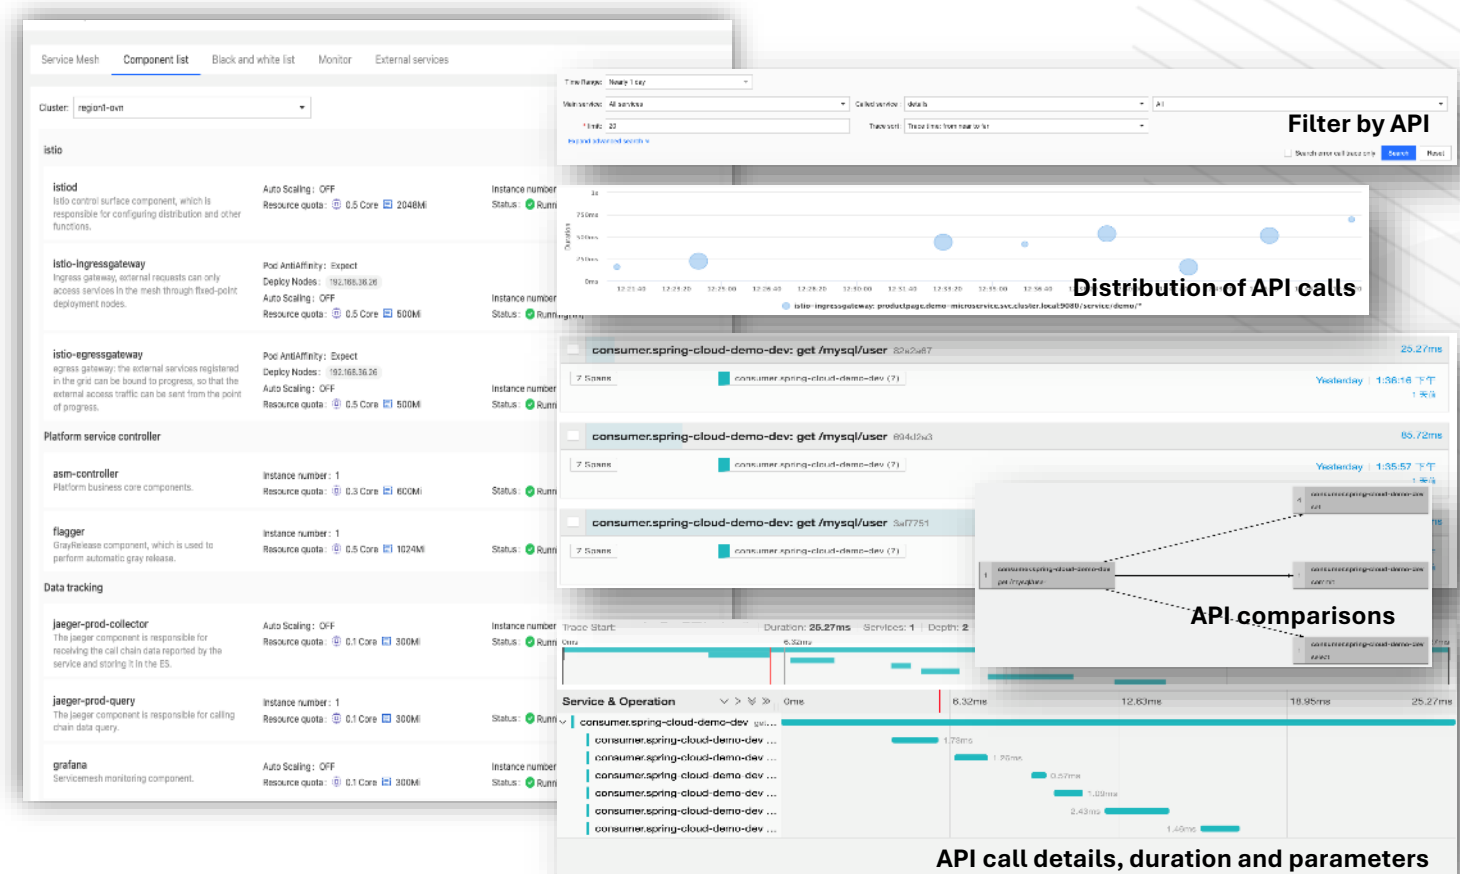

Accelerate Time-to-Market

- Integrate any existing DevOps tools your developers love to use
- Built-in support for common tools that work out of the box
- Fully customizable DevOps processes and workflows
- Enforce policies and encourage best practices with “golden paths” and “paved roads”

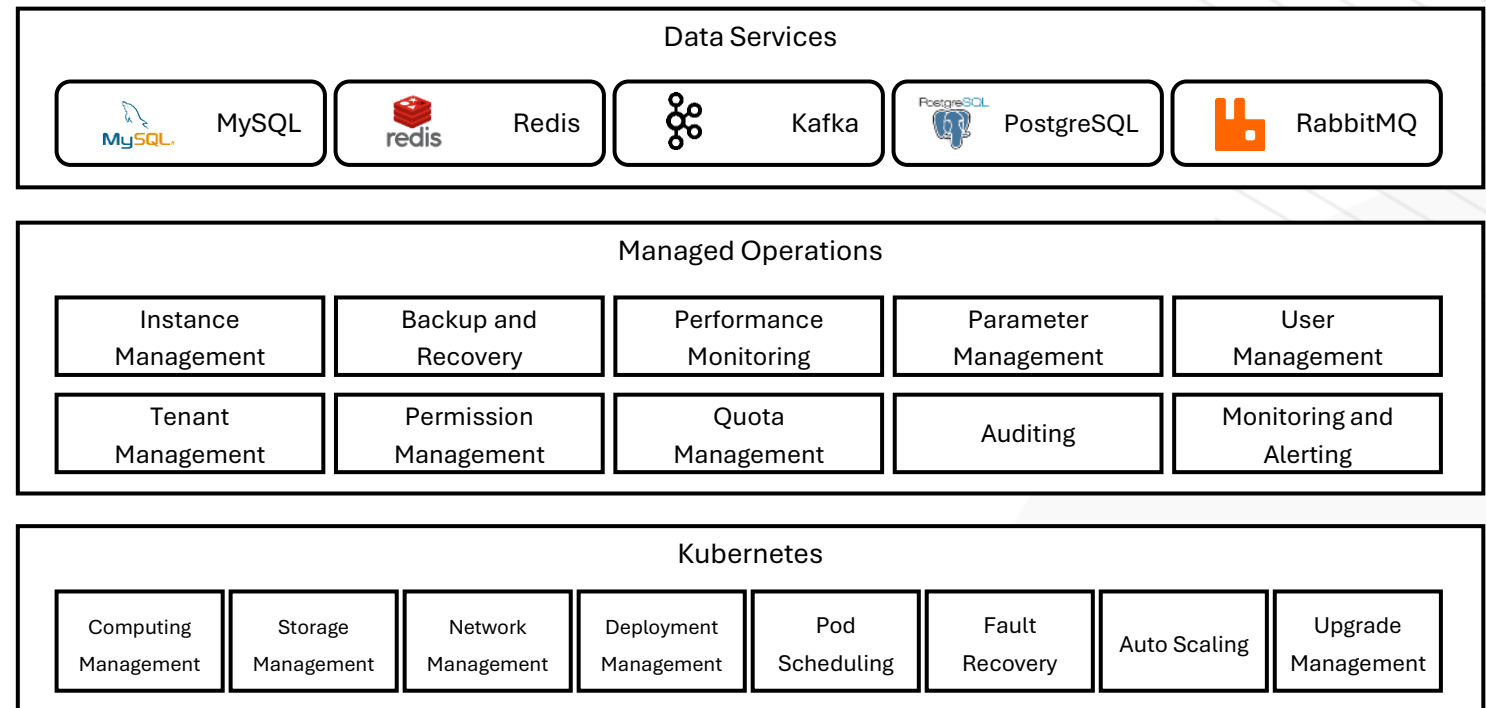

Simplify Service Mesh

- Fully managed Service Mesh infrastructure
- End-to-end observability
- Traffic management & mediation across service components
- Advanced service deployment strategies (canary deployment, A/B testing, blue-green deployments)
- Better reliability & security

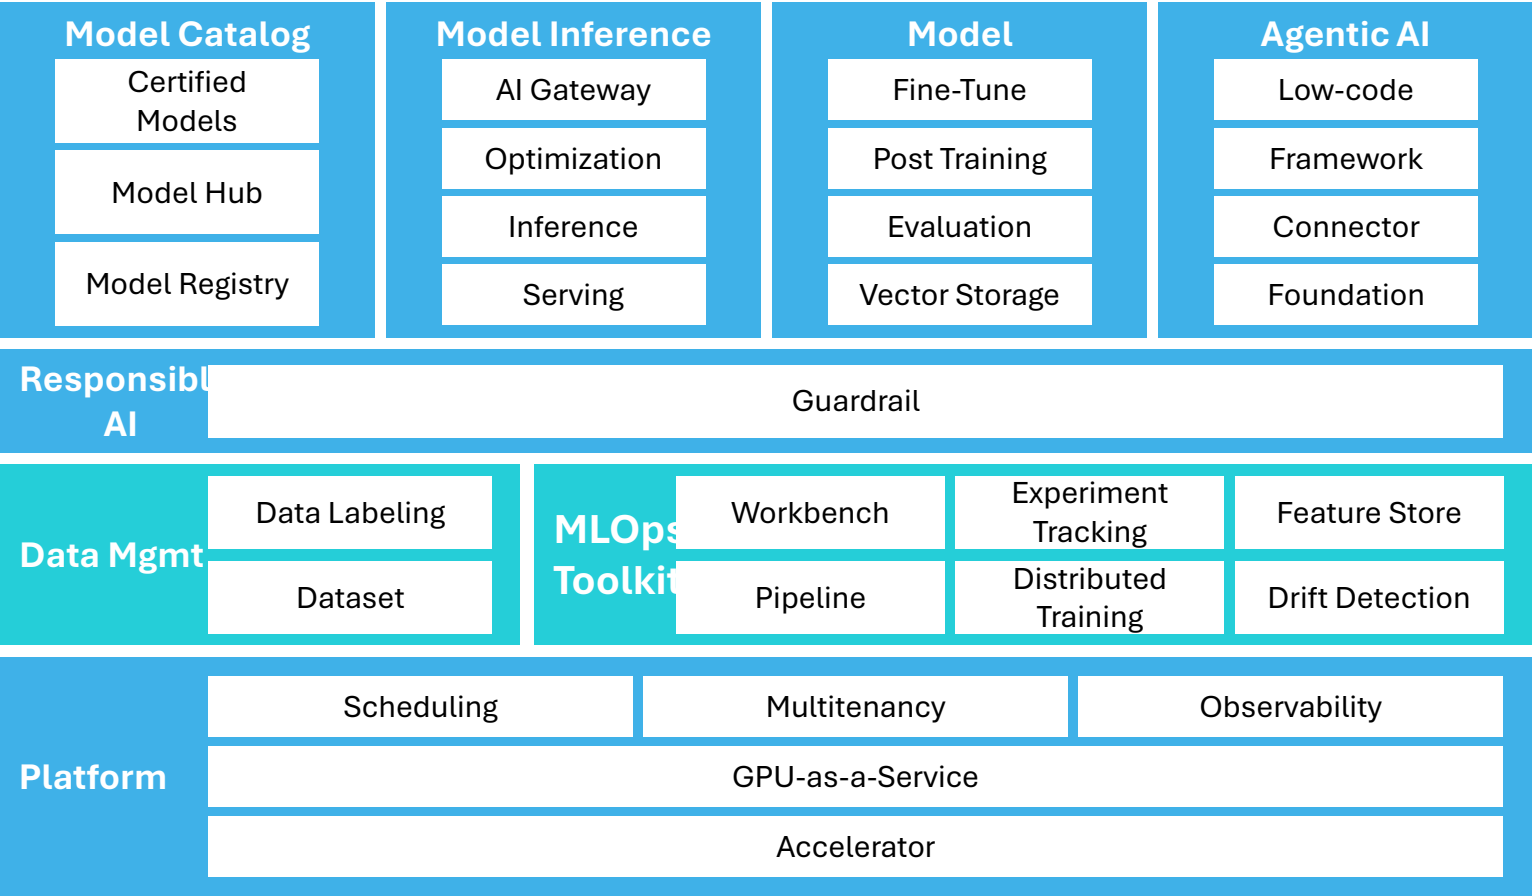

Cloud Native Data Services

- Full lifecycle management with K8s operators
- Abstracted components delivered as managed services
- Enterprise ready: availability, security, performance & disaster recovery
- Enterprise grade 7*24 support from Alauda

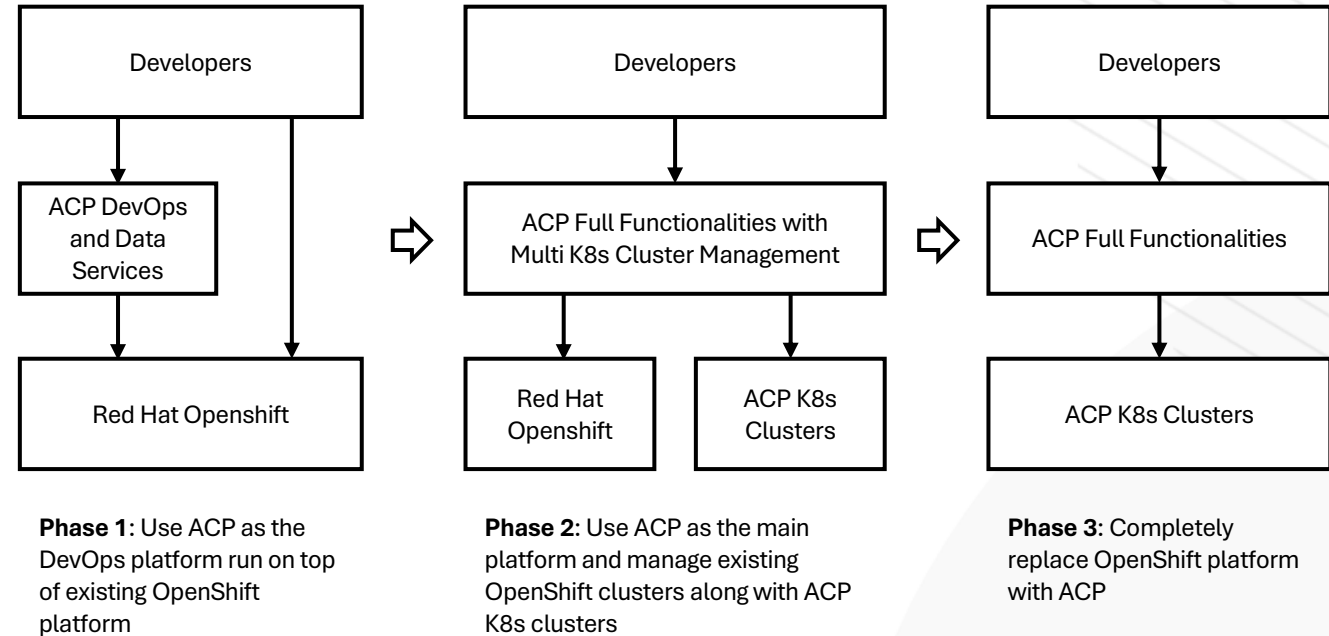

Alauda AI Product Architecture

- High-Performance Inference**
Fast, elastic serving with efficient GPU utilization.
- Streamlined Model Customization**
Simplified alignment and RAG data-to- model workflows.
- Accelerated Agentic AI:** Standardized build-test-release for safer, faster agent delivery.
- Unified Hybrid Platform:**
Consistent operations and governance across environments.

Maximize Return on Investment

- More features: ACP provides advanced DevOps and data services out-of-the-box.
- Hybrid-cloud support: ACP works seamlessly with public cloud Kubernetes clusters like EKS and AKS.
- 50% lower TCO: ACP reduces costs compared to OpenShift.

Recommended by Gartner

Honorable Mentions

Alauda: Alauda offers a Kubernetes-based DevOps platform called Alauda Container Platform (ACP). ACP leverages open-source components to deliver a fully managed, integrated set of capabilities for cloud-native development and delivery. Additional capabilities include container management, cluster management, API management, service mesh, and hybrid and multi-cloud management. Alauda primarily serves customers in China, but is looking to expand globally.

Alauda vs OpenShift

Multi-Cluster by Design

- **Centralized Management:** Unified control for automation, observability, security, and policy across multiple clusters.
- **Cross-Environment Flexibility:** Easily manages apps and clusters across hybrid, multi-cloud, and edge environments.
- **Built-In Observability:** Includes monitoring, logging, auditing, and tracing capabilities.

Built-In Full Application Platform

- **Multitenancy:** Built-in support for secure and efficient cross-cluster multitenancy.
- **Application Service and DevOps Tools:** Ready-to-use caching, MQ, streaming services, and DevOps tools.
- **Customizable Developer Portal:** Easily customized to enhance developer productivity and collaboration.

Superior Service and Customization

- **Onsite Support:** Direct, responsive support from Alauda's own experts.
- **Flexible Customization:** Easily tailored to meet specific organizational needs.
- **Onsite Training & Consulting:** Expert-led training and consulting to ensure successful implementation.

D Bank: OpenShift to Alauda Container Platform

*Southeast Asia's largest bank and **Asia-Pacific's #1** OpenShift customer*

- **Broken Vendor Lock-in & Reduced Costs**
 - Successfully replaced expensive Pivotal (Broadcom) and Red Hat OpenShift legacy environments.
 - Achieved >50% reduction in TCO (Total Cost of Ownership) while regaining full architectural control.
- **Unmatched High Availability**
 - Implemented Active-Active Cross-DC Failover at the service level.
 - 99.999% Availability with zero downtime during failover drills.
- **Full-Stack Automation with Huawei Infrastructure**
 - Automated provisioning of Compute, Storage, and Network resources directly from the container platform.
 - A unified "One Cloud" experience that simplifies operations for IT teams.
