

Introduction to the Threat Landscape

In this course, you will learn about the cyberthreat landscape. This landscape includes the threats that endanger computer networks, the cast of bad actors who are behind these threats, and the cybersecurity first principles that, if followed, can keep you and your computer network safe. This course is designed as an entry point for individuals who are new to cybersecurity.

Course Duration

- Total course duration (estimated): 3 hours

Who Should Attend

Anyone who wants to learn about the threat landscape should attend this course.

Certification

Upon completion of this course on the Fortinet Training Institute, you will obtain the **Introduction to the Threat Landscape** exam badge. This exam is part of the Fortinet Certified Fundamentals - Cybersecurity certification track.

Prerequisites

There are no prerequisites for this course.

Agenda

1. Introduction to Cybersecurity
2. The Threat Landscape
3. Social Engineering
4. Malware

Objectives

After completing this course, you will be able to:

- Describe cybersecurity and the principles of information security
- Identify the types of bad actors, their methods, and countermeasures used against them
- List different social engineering techniques
- Describe malware types and their delivery methods

Training Delivery Options

Self-Paced Training

Includes online training videos and resources through the [Fortinet Training Institute](#) library, free of charge.

Program Policies and FAQs
